

Dear Colleague

Introducing interest groups – join your favourite for free

Now you are an Affiliate of the Royal Society of Chemistry, you can add one interest group to your membership free of charge, and join as many others as you like.

Connecting you to your community

Interest groups are scientific networks run by members, each focused on a specific area or application of the chemical sciences.

Each group is unique, with many organising events to cater for both their members and the wider scientific community. These events range from multi-day conferences and workshops to training events.

Many groups have their own portfolio of awards to recognise significant contributions to the field, as well as travel bursaries to help their members attend conferences.

Joining one or more is an excellent opportunity to network with peers in your chosen field.

How do I join an interest group?

You can find information about each group [on our website](#).

Join a group

When you have chosen your group, contact us to join a group.

Best wishes

Royal Society of Chemistry membership team
